DETAILED ACTION

Claims 1-4 are pending in this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

1. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Bourke et al. (U.S. Patent No. 5,637,320).

Bourke et al. ('320) teaches a formulation for oral administration in a multiparticle form, where the first portion is designed to release the drug at a rate as to maintain therapeutically effective blood levels (i.e. sustained release) and a second portion is formulated so as to release the drug promptly following administration to obtain a relatively immediate therapeutic response (i.e. rapid release) (col. 1, lines 60-67 and col. 2, lines 1-2). The reference teaches the drug as an analgesic i.e. naproxen (col. 1, lines 17-19). The reference teaches formulations of the invention maintaining a therapeutic effect over a 24hr period with peak levels between 2-16 hours (col. 3, lines 3-7). The reference teaches the formulations further containing lubricants and polymeric materials (col. 3, lines 23, 28-30).
